

I want to make this count

## CYRAMZA BLOCKS MULTIPLE LIGANDS OF VEGF RECEPTOR 2

- **Binding directly** to the ligand-binding pocket of VEGF receptor 2 to block binding of **VEGF-A, VEGF-C and VEGF-D**\*
- VEGF-A, -C and -D have been shown to **induce angiogenesis** in preclinical studies†

\* As demonstrated in non-clinical studies, CYRAMZA inhibited angiogenesis in in vitro and in vivo models.  
† VEGF=vascular endothelial growth factor
